

Hosta Forest School

Annual report of the association's activities 2023

The association, with the same zeal as before, strove to expand in 2023 by offering knowledge and practices that restore man's dignity of the highest form of Natural Intelligence, to know oneself as such, to perceive biology as divinity, to treat nature as sacred and, in cooperation with it, gradually transformed into a man whose actions reflect the awareness of the Oneness of Life.

We are in the natural process of evolution of consciousness and we are passing that part of our development that stops the barbaric attitude towards Life, in order to enter a new round of maturing on a higher level of being and harmony with Nature and the Intelligence that rules it. Anyone who 'reads' the signs of this development allows himself to be transformed by the natural process of raising consciousness and is aligned with the general raising of vibration on Earth. He abandons the self-based attitude towards himself, nature and Life and becomes a part, with Unity Consciousness and consideration motivated behavior of the New Earth. People who allow the natural process to transform their thinking and behavior in Life into more harmonious beings, enter a new cycle of transillumination of their energy, in which there is no selfishness, lack and disease.

The age of insensitivity to Life, be it your own, your children, animals, plants, trees or the planet, is over. Anyone unable or unwilling to abandon the low-consciousness behavioral characteristics of unfreedom, disrespect, and non-awareness will fall with the dying world. Separation occurs at the level of one, family, community, nation and planetary consciousness of man simultaneously.

Podcast

Hostarka came to life in October 2022 with the intention of helping someone who is not yet independent in reading the signs of the Happening to get started. It releases approximately one drop per week and is a progressive maturation towards independence of Understanding and energy sovereignty. Those listeners and readers who benefit the most from it are those who let themselves be guided by it, as it is are given to them and with as much as possible the strong presence of the attributes of the Living..., with composure, regularity of consolidation and seriousness of bringing a new way of thinking to life.

For generations, the human consciousness has been hardened in the belief that we are a thing that depends on things, phenomena and circumstances, that we are the product of random mutations of lower forms of Life, that we are transitory bodies, separated from the All, therefore the same intensity of hardening is needed in the opposite, that the old mentality collapses and creates space for new, more natural and more life-beneficial possibilities for shaping oneself and society.

A vision

What is it that drives you to live Life the way you live it? Is it the fear of survival, the unconscious inertia of the past, the feeling of helplessness, is it the desire to move up the social ladder, to possess or assert yourself, is it a lukewarmness that repeats for the crowd? Is it a genuine call to serve, to be useful to Life, is it a love for doing something that nurtures you and others? Is your consciousness busy defending, preserving and increasing your world, your opinions, your ambitions... or creating the unique inner Beauties that preserve and increase Life?

These are questions that Hosta asks itself and answers them carefully. If the driving force of your action is fear for yourself and your own, then you serve yourself at the expense of the Whole, if the initiator of your action is trust in Life and Its Order, then you relax in 'saving yourself' and expand to serve the Whole. A vision that allows others their own rhythm of maturing towards active Love and respects the free will of the other, is surely the highest image to which we aspire. Without conditions or expectations, we share the knowledge and practices that restore freedom and power over man, so that, once and for all, he can break free from the grip of the force of deception that has captured his mind and cut him off from his heart.

Mission,

that supports this Vision is to present the Law and the Will of Life in order to tune in to it, and to bring people closer to a healthy, useful, holistic and saving alternative that they can choose to initiate their action. Humans have agreed to make decisions from the mind, which, due to its disconnection with Nature, works past it and against it. Because of this, we lose naturalness in ourselves and in the environment. We do not know the Law of the Natural Intelligence of Life, which, by and through Happening, regulates all things to the highest possible extent into eternal self-preservation.

Because we are not in harmony with Its principles and rules, discord returns to us with the destruction of everything. Our bodies and creations do not have Its characteristics, they have no value for Life. This vision and mission burn in the Hosta's heart like an inextinguishable Image that dictates the step.

It wants and must manifest itself in this world through behavior and action. Another focus of the mission of all those who want to actively Love is the willingness to forgive everyone everything, to detach ourselves from the barbaric past and what we have caused ourselves in nature from it, to forget the traumas and to move lightly into the creation of a higher reality, not caring about anything else.

The vision of a man who knows himself, who knows his Origin and his creative Power, remains the fundamental motivation of Hosta's operation.

For a very long time, my..., human Source of 'inspiration' was frustration, anger, loneliness, helplessness... in relation to the only Value that Lives me. That's why I and Hosta incubated for 20 years, trained in a new approach to Life, before turning to active love and starting to realize inspirations freed from the traumas of barbarism. This inspiration is the ever-growing energy of Love, which wants to let go of everything that does not allow it to expand beyond the sense of 'personal self', so that it can embrace a larger piece and identify itself with the Oneness of Life. In this way, it can accept a new thought and a new attitude towards everything and heal from the trauma.

Clinging to anger and resentment does not allow expansion, it keeps the energy in a sense of sacrifice, which wants to show the world that it is not to be trifled with, it remains untransformed in demanding changes from others. This energy needs discipline, quiet reflection, and self-love to transform into a creative force that naturally expands again and integrates into the greater Whole that heals it.

Personal transformation, expressed in behavior and attitude towards everything, is the only path of active compassion.

Forest school and healing

In the summer of 2023, Hosta offered independent individual forest retreats under its leadership for the first time. As with the group retreats, it turned out that the progress of the retreat and maturation through it is determined, above all, by the willingness of the participant to let it do its cleaning work. The participant, with his beliefs, rebellions, fears and spiritual inflexibility, is the main inhibitor of healing, however, without exception, the retreat shook, loosened and cleared the discrepancies of everyone who had the courage to spend 9 days alone in the forest. Everyone received at least one impermanent gift, the healing and clarification of a certain dissonance in whole or in part... and initiated a healing process that unfolds in the knowledge of the participant even after arriving in the everyday world and, like a silent groundwater, gently doses insights and transforms him permanently.

Multi-day forest retreats prove time and time again to be a wonderful remedy and will play a major role in the approach in the new cycle of human development to healing as they were before the advent of material science and classical medicine, which treat humans as fleshy mechanics, without understanding about the causality of oneself and the origin of the disease.

The novelty of Hosta is also one-day personal and group treatments for school and kindergarten classes, work teams and other closed societies that would like to permanently increase personal and group harmony, health, creativity and peace.

We are also open to meetings with children or teens who feel the need to clarify themselves and are in a personal, family or identity crisis. The course of treatment is adapted to the child's needs and interests, in regular weekly meetings of a few hours in nature, where loving movements take place, which the child, with the support of the family, can realize in his behavior.

Education of the new age

The new guidelines of education include knowledge of oneself and the Source of one's own existence as the primary Branch from which other spiritual and material disciplines arise that support It, especially:

- the fundamental building block of sovereignty or the holy grail of personal integrity..., solitude and silence in nature, which invites a child (or an adult) to deep relaxation, thereby creating the conditions for connecting with the Source, is a non-circumventing starting point of education, which gives the child experience Of the Magnificence and Order of Life that transcends it. In the last 20 years, schools have appeared all over the world that introduce children from the first day to internalization, and the peace of mind, which is the key to connecting with the Source, to self-knowledge and personal mastery. Less emphasis on memorizing the knowledge that the child receives from the outside, and more and more emphasis on directly receiving the Gyana knowledge, which, from self-understanding, the child draws from the revived Inner tranquility and through the direct and undisturbed experience of Nature. Such a child perceives himself as nature, not as a visitor in it, so it is natural for him to include it in creativity, become its custodian and naturally multiply it in spirit and in things, and his Vision is as wide as the universe, incapable of thoughts that would may harm him,
- those activities and those conditions that give the child the opportunity to realize his inner inspirations. The new education will outgrow the mass treatment of children, the material-based interpretation of Life, the management of schooling based on the past, and will fully embrace the realization of those needs for knowledge dictated by the awakened naturalness in man. A broad, heartfelt, considerate mind towards Life is a decision-maker in formal and informal matters, valued as an Authority, nurtured and brought up by example.

Part of the curriculum and active practices are:

- the law of Life as the starting point for the formation of human Understanding,
- natural law as a guideline for man's attitude towards himself and other forms of Life,
- knowledge of spiritual technology and increasing compliance with Natural Law,
- knowledge about man as the highest technology of Natural Intelligence, which has no limits to self-realization,

-
- knowledge about the light origin of creation and human creative power,
 - emphasis on self-expression through significance, skill, wisdom, mastery..., through music, poetry, design, production and cultivation with the Life harmonized inspirations, or the necessity of their manifestation in the world,
 - other newly created emphases, knowledge and practices that will partially or fully purify the teachings and practices harmful to nature, human nature and Life...

Hectare of Abundance

In 2023, a member of Hosta launched the charity project Hektar Obilja with the aim of purchasing land and real estate, which will serve as a center for the realization of new directions of human personal and social development in the aforementioned directions for the area of Slovenia and beyond. For this purpose, she took the Silk Road motorcycle route, and after her return, she visits places in Slovenia with travel insights and spreading the message of the Hosta. Collection of funds is done through text messages, direct donations and purchases of the Feniks Rising Empowerment Manual, which is now in its 3rd reprint. The project is open and alive.

Improvements

Hosta continues to be connected and growing with the worldwide movement of Spiritual Science, serving humanity and the Earth by realizing:

- natural law,
- self-ownership,
- interest in self-enlightenment,
- breakthrough natural technologies
- and service work.

Natural law is the understanding and observance of the Natural Laws of Life.

Self-ownership is mastery over one's own energies (over the soul, Merkaba) and the only possibility of realizing Natural Law.

The interest in self-enlightenment is the realization that advancing on the path of Light is the only evolution available to us and our very own mission.

Breakthrough Natural Technology Human wholeness, the Merkaba activated body, is the highest form of Natural Technology! It is capable of anything that a thought connected to the Source can imagine.

Service to the Whole is a vision of a man awakened in Love who, without the prospect of reward or profit, lives the Law of Life, appreciates and cherishes Its biologicalness, and brings all-inclusive inspirations to life.
